

ZEPHIRO SNOW 600

600 Watt Snow Machine with wired control

It is well known how the world of show business and entertainment is based on the fusion of music, images, lights and environmental effects. The sensory involvement of those who enjoy the entertainment event is increasingly present nowadays. Centolight knows very well this need and thanks to the Zephro line it offers a wide range of machines for smoke, fog, bubbles, snow and more.

Zephro Snow 600 is a compact snow machine; designed for small to medium environments and equipped with wired control. It generates a soft and persistent snow, particularly appreciated in all those situations where a simulation of winter and snow scenarios is required.

It has a power output of 600W, is designed for indoor applications and can cover about 30m² with 1 liter of fluid.

PRODUCT DETAILS

Key features

Continuous snowflakes emission able to cover an area of over 30m²

Wired Controller to start and stop the snow emission

Specifications

Power Consumption	600 Watt
Tank Capacity	1 Liter
Coverage Area	30m ²
Wired remote controller	Start/Stop Switch
Mounting Bracket	Included
Power Requirements	220V AC, 50Hz
Internal Fuse	10A 250V fast blow 5x20mm
Machine Size (WxDxH)	330 x 204 x 121 mm (13 x 8 x 4.8") - Bracket not Included
Weight	3,1 Kg - 6.8 lbs.
Packing Size	410 x 250 x 230 mm (16.1 x 9.8 x 9")
Packing Weight	4 Kg - 8.8 lbs.
