

## PORTRAIT-412 SET

Set of 8 LED PAR 4x12W RGBW 4in1 with lithium battery and flight case with charging function

PORTRAIT-412 is a battery-powered (or mains-powered) PAR, specifically designed for rental applications. You can easily control it by choosing among IR remote control, wired DMX-512 connection, Wireless DMX (by using the SOUNDSATION AIRCOM-126, 2.4GHz Wireless DMX Transceiver - check [www.soundsationmusic.com](http://www.soundsationmusic.com) for further details), and Wi-Fi Control by using LED LAMP free APP for iOS® and Android® devices. This fixture is part of a set composed by 8pcs PARs housed in a flight case with charging function. You can easily recharge by placing them in the flight case, connecting to power with the eight IEC connectors, and finally connecting the flight case external power connector to a mains outlet. The lighting emitting system consists of 4pcs 12W RGBW 4in1 high-brightness LEDs with a life-span of approximately 50,000 hours. Each LED features a high-quality lens with 15° beam angle and 29° field angle, making this PAR ideal for all applications ranging from wash to beam use. The PORTRAIT-412 has a highly compact housing, and can be fit inside 300x300mm truss to create wonderful wash effect inside the truss structure. The fixture can sit on even and solid floor and work as an up-light. It also has a built-in adjustable tilt support. By pushing the tilt support, the fixture tile can move up to 25° to wash walls or facades. The high-efficiency lithium battery guarantees a complete charge from zero within about 5 hours, and a working duration ranging from 5 hours (full color mode) to 12 hours (single color mode). The infrared remote control allows remote control of the main functions without the use of DMX.
